About me

Alessandro Candiani
DNAPhone co-founder

After receiving his Ph.D in Information Technologies, Alessandro Candiani worked at the Engineering Department of the University of Parma as researcher on different activities including fiber laser for high power applications, optical fiber sensors, biosensing and photonic crystal. In 2014 founded with his colleagues DNAPhone S.r.l., a high-tech company that implements innovative solutions for measuring biochemical parameters using integrated optical devices with smart and mobile technologies. Today, DNAPhone implements and sells two distinct product lines, professional tools for Quality Control in the agri-food sector, and technological platforms for educational sector.

A photograph of a small green plant with two leaves growing out of a clear glass bottle. The bottle is placed on a weathered wooden log. The background is a blurred natural setting. A semi-transparent green horizontal band is overlaid across the middle of the image, containing the text.

THANK YOU
